

IN THE SPECIFICATION

Please replace the paragraph beginning at page 6, line 9, with the following rewritten paragraph:

Figure 1: Phosphorylation of rh-GAA produced from cells cultured in the presence of DMJ or Kif alone. The y-axis depicts the per amount of [ $^{32}$ P] incorporation, the X axis represents the amount of inhibitor added to the cultured cells, referring to Table 1 for the amounts used. ~~is the DMJ curve, is the Kif curve~~ □ is the DMJ curve, ● is the Kif curve.

Please replace the paragraph beginning at page 6, line 13, with the following rewritten paragraph:

Figure 2. Phosphorylation of rh-GAA produced from cells cultured in the presence of rh-GAA with the combination of DMJ and Kif. The y-axis depicts the per amount of [ $^{32}$ P] incorporation, the X axis represents the amount of inhibitor added to the cultured cells, referring to Table 1 for the amounts used. ~~is DMJ, is Kif.~~ □ is DMJ, ● is Kif.
